

## Weather Condition Expected during (30 July-02 August)2024

The latest forecasts and analyses from the National Multi Hazards Early Warning Center Hazards indicate that the weather in the Sultanate of Oman will be affected by an extension of a low-pressure system in the Arabian Sea, starting from the evening of Tuesday, 30 July, until Friday, 02 August 2024 . It is expected that clouds will advected over most of the governorates, with chances of isolated rain of varying intensity, occasionally thundershowers, leading to the flow of wadis and some flash floods

Experts at the National Multi Hazards Early Warning Center Hazards are monitoring the developments of the weather condition and urge public to follow the issued bulletins and reports
